paintings and bronzes, and oriental carpets to make your rooms a dream of elegance and luxury. By utilizing the things at hand that will tend to simplicity and harmony you may be able to deceive the trained eye of your opulent caller into believing that your little drawing-room is the very extravagance of luxury. The combination of utility and beauty is much better than beauty alone, and if you must have a wood box in the parlor make a divan of it. Studied negligence is always effective, and an artistic hand can transform a room within a minute to look like a graceful, ingenuous girl instead of a stiff-spined, uncommunicative spinster. Place a couple of chairs in social relation to each other, as though their late occupants had been indulging in an easy, delighting tete-ate; give the window curtain a magical touch that will break its straight lines and show a bit of charming vista without; be careful of carelessness and affect unaffected-

It is not well to follow the caprices of fashion in decorating your home. In the matter of wall paper, for instance, take into consideration the size and location of the room. If it receives the cold north light use a warm-tinted paper, while a gray paper may look better in a room with a southern exposure. A delicate, retiring wall enlarges a small room, while a flaring, bold design contracts the apartment unto suffocation.

A pair of modish siceves were generously large to the elbow, where the fullness was roughly gathered under a small rosette, after the style of half a century back. The gown to which they belonged was slashed over each dart, and a lining of vieux rose moire displayed. The dickey was also of vieux rose and sported the incrovable bow of rose moire, edged with black maitese insertion. This fashion of finishing skirts, collars, and sleeves with ribbon covered with insertion is one of the season's fancies.

TABLES TURNED ON TILLMAN

South Carolina's Dispensary Law Declared Unconstitutional.

MUST GO OUT OF THE BUSINESS

The Law, the Supreme Court Declares, Cannot Be Upheld on Any of Its Vital Points. Governor Tillman Will Obey the Law for the Present-Views of Congressmen.

COLUMBIA, S. C., April 19.-The Tillman state dispensary liquor law has been declared unconstitutional by the Supreme Court of South Carolina, two justices concurring in and one (the Tillman member of the supreme bench) dissenting from the opinion.

The decision was rendered in the composite case of an ecru combination with mignon-ette green velvet and this lace. Other laces of the season are the point venise, point Milan, point de Flanders, point applique, Irish point, duchess, and bruge, with many other cheaper varieties, which are still very effective. case originating in Darlington, testing the constitutionality of the dispensary law and appealed to the Supreme Court by the state The boot and shoe jobbers are giving considerable attention to the russet shoe during the Spring season. The shoes are of a lighter

tutional in nearly every respect, and practically holds that it cannot be upheld on any vital point. The profit to the state feature is declared victors.

The court decides, after reviewing the case, that in no view of the suit can the dispensary act be regarded as a police regulation of the business of seiling intoxicating liquors, and that if it could be so regarded such police power does not include the power on the part of the state to engage in carrying on such business. As to the revenue feature, it is held business. As to the revenue leature, it is need that the legislative department under the general power of taxation conferred upon it cannot impose any tax except for some public purpose, and upon the same principle it seems clear to the majority of the court that any act of the legislature which is designed to or has the effect of embarking the state in any trade which involves the purchase and sale of any article of commerce for profit is outside of and altogether beyond the legislative power conferred upon the General Assembly by the

Satin and moire ribbons are selling almost by the ton for hats, bonnets, and gowns; for wrap decorations, walst of lace insertion and ribbon; sashes, bread, narrow, and medium. Fresh, beautiful colors and designs in fancy ribbons are selling like "hot cakes," and last year's slightly passe patterns are being readily disposed of for fancy work uses on "sacrifice counters." Trade, the court says, is not and cannot properly be regarded as one of the functions of the government. It seems to the court that the question as to the right of the state to engage in any trade or business for the purpose of gain has been practically determined adversely to such right in the recent case of Mauldin against Greenville, a local case, which the court cited as authority for to-day's decision. The court in the Chester case, one of those decided to day, carefully avoided the consideration of any constitutional question. Holding the act unconstitutional, the court decides that it is unnecessary to consider the Trade, the court says, is not and cannot lamp stands, candiesticks, and tea kettle standards than brass. It is wrought into all sorts of arabesque designs, and is something of a relief after the hammered brass period, when houses, especially where there were daughters, glittered with brass plaques and ornaments of every kind that could be ham-mered out by their hands, decides that it is unnecessary to consider the minor details of the law, and reaffirmed the

opinion of Judge Hudson in that case. In answer to a rather pressing request for a statement Governor Tillman to-day said: "I haven't read it and don't know its scope Some of the present celebrated scientific yet. I have tried to enforce it because it was the law. The force of constabulary in the city, formerly numbering from fifteen to twenty men, all armed with revolvers and Winchester rifies, has been reduced to three men, who confine their attentions to the railroad depots.

The town is very quiet to-night, although whisky may be had at any saloon in the city. This has been the case indeed ever since the dispensary law went into operation on July 1, 1892. The difference is, however, that to-night mixed drinks and other liquors are passed over the bar openly. The action of the Governor is watched here with great anxiety.

Potatoes hashed and browned form the vegetable accompaniment to this breakfast. Peel and boil a half-dozen, and when they are cold hash them. Put them in a dish with half a bup of cream, a tablespoon of butter, a little sait and pepper, and a little nutmeg. Sprinkle over them two tablespoons of fine bread crumbs, a little grated cheese and a few humps of butter, and bake until brown.

For bread with this breakfast, serve potatobread rolls. Boil a pound of good mealy potatoes, rub them through a sieve into two pounds of flour. Rub in also an ounce of butter. Add an egg, the half of a yeast cake dissoived in a cup of tepid water, and enough

Senator Perkins Voices Her Protests Against the Proposed Tariff Bill.

WILL RUIN INDUSTRIES

Criticism of Administration Tariff Refor Policy for a Decrease in Amount of Money Circulated in Trade, Manufacture, and Wages of \$12,000,000,000 a Year.

Senator Perkins, of California, opened his speech vesterday with a general statement lescribing the business and financial con ditions of the country, saying that he preferred to consider and discuss the question as a business rather than a political matter,

The question of expense and revenue is a ber of every community, and the same rule applies to us as individuals, and must govern u collectively, whether organized into a munici pality, a state, or a nation. It requires in round numbers say \$500,000,000 per annum to properly carry on this government. This large sum of money must be obtained either by direct or indirect taxation. It must all come from our own people and from thos who do business with us from other countries, selling us the products that come from their soil or that which is manufactured by the skill or lator of foreign workmen. Our people pay their taxes for the support of municipal county, state, and national government, and, in addition thereto, they must pay a special license for conducting the business in which they are engaged.

state, and national government, and, in addition thereto, they must pay a special license for conducting the business in which they are engaged.

Why, then, should we permit foreign nations to bring their products here to compete with our industries, giving them eq. alf not better advantages than our own people.

It has been the plan for the past thirty years of wise American statesmanship to raise about one-half of the expense of the government by placing an import duty upon the products of other lands that come into this county for consumption or use of our people, and to so adjust these duties that they will best protect and foster American industries, and thereby dignify and protect American labor or foreign lands. That this is the correct principle is evidenced from the fact that during this time our industrial interests have been stimulated and our people prosperous, contented and happy.

The bill before us for consideration, designated a tariff for revenue, proposes to take from the import duties \$75,000,000, which is simply a license the producer pays for the privilege of entering into our home market with their merchandise on equal terms, and impose this additional burden upon our own people in the form of an increased excise duty and an income tax upon the gain or profit made by their diligence, industry, and enterprise.

We have been accustomed to hear much about a tariff for revenue without discrimination, and upon these distinctions the discrimination, and upon these distinctions the discrimination, and upon these far away from our course. The Democratic party has fallen from its high estate, abandoned its principles utterly, and instead of making open and bold war upon its ancient doctrines and adopted platform, enters beneath the Republican platform, attacks the Republican tariff measure, which it declared unconstitutional and robberly, and tearing it down, attempts to build up on the same principles a venker structure from the same materials. We are thus brought to this strange contest with no g

the then took up and discussed the ques-tion in detail and at some length as to the various California interests, borax, quick-silver, beet sugar, sulphur, sait, fruits, nuts, wine, wool, and coal as affected by the bill, claiming for them all the protection given under the present laws, Referring to the labor problem, he said:

labor problem, he said:

We are indeed confronted with the strange problem of an overcrowded people, a problem which the fathers of the republic never dreamed would come so soon. To this may be added the marvelous devices of invention in the direction of labor-saving machinery. Men were never so cheap nor muscle so superficus in the work of the world as now. The star of empire has moved westward until the tide of population has met the confines of the Pacific. We find unemployed men everywhere. Mines and factories closed and thousands marching toward this city, and everywhere enforced disenses and suffering. It was not so in the early history of the republic. It was not so in the early history of the republic. It was not so before the attempt to depreciate the intrinsic value of one-half our circulating medium. And indeed it was not so before the threatened blight of free trade fell upon the country.

The present administration assumed the con-

ing medium. And indeed it was not so before the threatened blight of free trade fell upon the country.

The present administration assumed the control of the country the 4th of March, 1893. During the seven menths following, as shown by Bradstreet, the falling off in the business of the clearing house amounted to the vast sum of nearly \$5,000,000,000, and it has kept up at that fearful rate ever since. This stupendous deficit represents the country's value of trade. Twelve billion dellars less money circulated in the ordinary channels of trade and commerce, in wages, in the manufacture of goods, in the employment of labor, and all this under the tariff reform or free trade policy of the present administration in the brief period of twelve months. Indeed, the nation stands appalled before the peril that threatens.

Of the income tax I can but say that it appears in the bill before us one of the most insidious and deceiful ever expressed in a multitude of words.

The condition of affairs in this country is

in the bill before us one of the most insidious and deceifful ever expressed in a multitude of words.

The condition of affairs in this country is vastly different from what it was a quarter of a century or more ago. The discontented and unsettled classes, of which the number is steadily increasing, have no longer new and virgin territory to occupy when they become dissatisfied with the older communities. The time has come when in the order of things we must have a fixel national policy upon all questions affecting the stability of the government. The shifting, fluctuating policy of the managers of the party of free trade in seeking to force its views upon the country, whether the people indorse them or not, is a striking illustration of its unitness to manage national affairs, and can but result in disaster to the party that attempts it. We can endure less foolishness than formerly. The people can stand less nonsense in the shape of unwise laws than when there was less suffering and idleness among them.

Meanwhile, his eyes fixed on the count, Yann silently leveled his carbine.

Inflamed by the iong, voluptuous embrace and moved by the strength of his passion, Alexis arose. Little by little he pressed closer against him the slight form lying so unresisting in his arms. With his impatient fingers he tore aside the silk folds of her gown.

fingers he tore aside the silk folds of her gown.

But the princess stood erect. The adorable modesty of her gesture, the look of amazement in her eyes, accompanied by so much love, so much fear, reminded Alexis of his promise. Falling once more upon his knees, respectfully, reverently, he laid his lips to the hem of her gown.

Barsouck saw all, even the look of mad passion with which the princess thanked Alexis, unconsciously promising to repay him a hundred fold for the sacrifice she now imposed on him.

A veil was suddenly torn away for the

exquisite, elevating—that of a woman's modesty.

Now he understood pure love.

As Alexis rose from his knees the prince entered. Certain of satiating his hatred, gloating over the horror into which his unexpected entrance had thrown them, the prince advanced deliberately toward the lovers, who stood trembling before him. He went cantiously, like a caterpillar creeping under the petals of a flower.

Alexis threw himself in front of the princess. But quickly disengaring herself the woman boldly confessed ali. Then, with a superb audacity, she stood staring in her husband's face.

Old Horostienko was beside himself with rage. Grasping the handkerchief which was to serve as signal to Barsouck, he threw it, with the force of a blow, in his wife's face.

Surprised to see the count still creet, he turned toward the window—and fell, shot through the eye.

Libe the others!

"Excellency." "Here." With bowed head, and drawing one foot

ward until his face touched his master's boot. "Are you always sure of your hand and "Go."

Yann was more than a man—he was a brute. Whence he came no one knew. From Lithuania, perhaps, judging from his name—the only words he could speak when they found him, a tiny babe, under a bush on the high road that crossed Prince Horostienko's estates. They left him to grow up in the courtyard among the servants and grooms. For his daily nourishment he depended upon the charity of the peasants and the scullions.

THE PLEASURES OF BOARDING.

The great majority of advocates of boarding

do not draw more largely from our boarding houses than they do. As a rule, not a single spirit is in sympathy with the other. Talk is prevalent, because one must say something or be adjudged unsociable. One has not even reserved to himself the right to be quiet. I
